

nvidia-smi (NVIDIA System Management Interface)

- Is a command-line utility, provided by NVIDIA.
- It offers monitoring and management of the GPUs.

nvidia-smi (NVIDIA System Management Interface)

- 3 Key features

- Performance monitoring.
 - Utilization, memory usage, temperature and power.

- Settings management.

- Controlling the clock speed and power limits.

- Device information querying.

- GPU name, driver version ,,, etc

```
hamdy@DESKTOP-26L8BIV:/mnt/c/Users/hamdy/cuda_course$ nvidia-smi

- Necessary data to make informed decisions

nvidia-smi command:

```
nvidia-smi
```

nvidia-smi command:

- **Monitoring GPUs Continuously**

`nvidia-smi -l 5`

- **Displaying Specific Information**

`nvidia-smi --query-gpu=gpu_name,driver_version,temperature.gpu --format=csv`

- **Setting Power Limits**

`nvidia-smi -i 0 -pl 200`

- **Permission mode**

`nvidia-smi pm -0`

- **Saving Output to a File**

`nvidia-smi -l 5 > gpu_log.txt`

nvidia-smi command:

- **To check the current clocks in use:**

`nvidia-smi -q -d CLOCK`

- **To check all supported clocks that can be used**

`nvidia-smi -q -d SUPPORTED_CLOCKS`

- **To determine certain clocks to be used:**

`nvidia-smi --application-clocks=1216,765`

`--reset-gpu-clocks`
